Job Posting *Bill of Material Manager*

When posting a job listing, it's easy to rattle off a list of necessary capabilities and experiences. Just like everybody else. But we are not everybody else. We're Airstream and our customers expect more.

You need to love working in a classic American Factory. You need to thrive in a fast-paced, cross-functional, problem solving environment. You need to develop a love for our mission and continually findings new ways to deliver upon it.

We're looking for someone who can take the discipline and thoroughness of Bill of Material (BOM) management and mix it with the proactivity, creativity and change management needed to take the BOM group into the next 100 years of Airstream greatness. Someone who has the skills and experience to tackle complex systems and processes but the humility to ask questions and advice. Someone who knows the importance of delivering on promises and relishes the opportunity to work in a collaborative environment. In summary, someone who can come help us figure out how to do it better.

We're not generic. You're not generic. Now we can get to the responsibilities:

Position Summary

Reporting to VP of Engineering, the primary function of the Bill of Material role is creating and maintaining the Material Master data and Bills of Material in the Sage MAS system. Product data is the lifeblood of any product manufacturer and this is a key role in the organization. This individual will lead and support a small team while acting as the overall information architect, seamlessly linking engineering and business data. This is a working-manager role that requires the ability to both lead and execute.

Job Duties

- Creation and accurate maintenance of Master item data, Bill of Material creation and maintenance.
- Will review and resolve routine Material Master and Bill of Material issues and will ensure that the system data is correct in Material Master, Bill of Materials, and Subcontract (SUBC) locations based on Engineering and Interior Design inputs.
- Route cause investigation and resolution for any BOM discrepancies
- Creation and maintenance of automated data linkages with Engineering data, with support from IT and CAD Administration.
- Overall responsibility to ensure that all product data is properly in the ERP systems to allow Customer Service to enter orders, Purchasing to order materials, and Accounting to route and cost items.
- Cost estimation for products under development, including top-down and bottom-up cost estimations with ongoing improvements in accuracy.
- Other various projects and duties required throughout the day, assigned by manager or supervisor.

Qualifications

- 2-year college degree in a business or technical field required; Bachelor degree preferred
- Proficient with MS Excel and Word required
- Working knowledge of Sage ERP and/or AutoCAD Inventor CAD systems preferred but not required
- Must have the ability to assess a situation, seek multiple perspectives, gather more information if necessary, and identify key issues that need to be addressed
- Must have the ability to find solutions to problems using creativity, reasoning, and past experiences along with the available information and resources
- Proven ability to manage multiple assignments and tasks (at different stages), set priorities, and adapt to changing conditions and work assignments required
- Strong critical thinking and problem solving skillset a must.
- 5-10 years of transportation design experience desired but not a must for the right candidate.

Airstream offers competitive salaries in addition to a comprehensive benefits package. Plus we love what we do and you can't put a price on love.
