

AIRSTREAM DIESEL

THE STANDARD FOR MOTORHOMES IN THE 1980'S

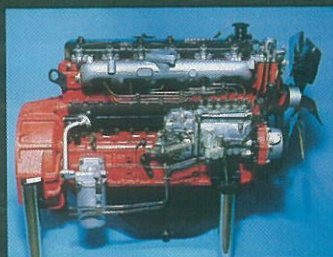

Airstream Long-Term Value

The Airstream Diesel Motorhome is distinguished because of its unique balance between operating economy, long-term value and luxury. Airstreams were built with true aerodynamic design since 1937 - back when lightweight towability was as important as it will be in the 1980's.

15 M.P.G.*

Only because of Airstream's lightweight/high strength design can you get top efficiency and long-term reliability. Without sacrificing the performance needed in the 1980's**, we now offer top-flight gas mileage.

15 miles per gallon in actual road tests! - with a cruising range of 1,043 miles using our 70 gallon fuel tank. That's double what many motorhomes of comparable size can offer. Without the performance and efficiency compromises of dual-fuel conversions.

Diesel Reliability

With no spark plugs or points, the diesel has proven reliability over hundreds of thousands of miles to give you lower operating costs with higher resale value. An engine developed to match the long-life of the Motorhome it's designed to power. And remember, diesel is a safer fuel too!

Airstream Balanced Design

Best handling, best ride, longest-life, lowest operating cost, most luxury—the things you want in a motorhome for the 80's are methodically designed into every Airstream Motorhome.

We achieve this with our dramatic aerodynamic design, high-strength/low-weight construction and diesel powerplant - all combined with Airstream's well known high standards of luxury, ride and quality.

With long term value and low operating cost as our major goal—the Airstream Diesel Motorhome is truly the Motorhome of the 1980's.

Contact your local Airstream dealer for more information or call us direct at 513-596-6111.

*Average of two-100 mile round trips in a 28' Airstream Diesel Motorhome, covering typical highway driving. Your mileage may vary depending on traffic, weather conditions and individual driving habits.

**Acceleration Times - 0-30 m.p.h. - 10.6 sec.; 0-50 m.p.h. - 29.7 sec.

AIRSTREAM DIESEL MOTORHOME

SPECIFICATIONS

Fuel Economy

15.35 miles per gallon*, 70 gallon tank

Cruising Range

1,043 miles

Acceleration Times

0-30 — 10.6 seconds

0-50 — 29.7 seconds

Vehicle Weight

11,150 lbs. (as tested)

Chassis

Chevrolet, 178" wheel base, 12,500# GVWR

Engine Type

Isuzu Automotive Diesel
—water cooled

Displacement

351 cu. in.

Horsepower

145 SAE Gross HP @ 3200 r.p.m.

Torque

289 ft. lbs. @ 2000 r.p.m.

Axle Ratio

4.56:1

Capacities

Water 50 gal.

Hot Water 6 gal.

Holding 35 gal.

Black 25 gal.

Dimensions

Length 28'2"

Width 7'9"

Height-Ext 9'2" Int 6'6"
