

Exterior and Interior

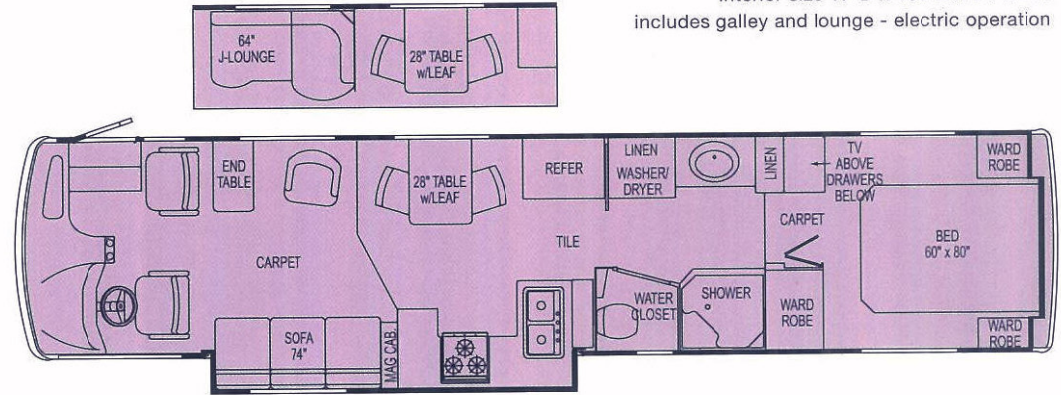

The XL's full basement chassis gives it unmatched storage capacity. It includes lots of extra touches, like the entry-door awning, which not only reduces heat, but will prove extremely convenient in the rain. Exterior water service hook-ups are all readily accessible in a centrally located system. And the dual fuel-fills allow you to fill the fuel tank from either side, making it easier to maneuver into tight fueling stations.

All controls are logically located within easy reach of the driver's seat. Standard widebody leather cockpit seating with an integrated 3-point Seatbelt System is designed for maneuverability, safety, and comfort.
