# PANAMERICA

**LIGHTWEIGHT. STREAMLINED.**

**FUEL EFFICIENT.**

Founder Wally Byam knew that a rounded low-profile shape would make towing easier and more stable. And he knew that aluminum would make his trailers as light as possible.

The successful combination of its rounded shape and lightweight design has made the Airstream world-renowned for their superior integrity. That's because Airstream employs semi-monocoque construction, consisting of an inner and outer layer of aluminum stretched and riveted to the frame. This frame becomes a working part of the integral structure.

Hand-built with a craftsman's attention to detail, this aluminum skin offers unmatched durability and strength for its weight. Just ask one of the more than 100,000 Airstream owners.

### PANAMERICA

The PanAmerica is designed for the adventurer that wants to explore every mountain road and open highway, the new 34-foot 2009 Airstream PanAmerica can haul two motorcycles, ATVs or other action/adventure gear, up to 2,500 pounds worth. The rear 11 feet of the trailer is configured as a garage, complete with a durable aluminum interior skin and textured floor. A gull-wing exterior door with fold-down ramp has been incorporated into the trailer's tail, and a pass-through door in the bulkhead with porthole window gives occupants access to both rooms. The back room is also equipped with storage cabinets, tabletop work areas, tie-downs, electrical outlets for power and speakers tied to the PanAmerica's crystal-clear sound system.

The fully equipped living space offers contemporary European luxury yacht-inspired design with flush cabinetry, flowing lines and indirect lighting. Stainless steel appliances and trim, leather appointments and a flush-mount flat screen television make this an extremely comfortable RV.
