

AIRSTREAM

Adventure, Inspired by Airstream

INTERSTATE

**VALUE, STABILITY,
DURABILITY...AND BETTER
FUEL ECONOMY.**

**THESE STANDARDS ARE WHAT SET
US APART – AND THEY HAVE FOR
NEARLY 80 YEARS.**

More than 65% of all Airstreams ever built (dating back to 1931) are still in service. This remarkable longevity has resulted in Airstream's equally impressive resale value.

Airstream has been in the class "B" motorhome business since 1988 and has produced motorhomes since 1974. The tradition continues with the Airstream Interstate 3500. The rigid unibody construction combines with a low center of gravity and standard Adaptive Electronic Stability Program (Adaptive/ESP) for a confidence-inspiring ride. Dual rear wheels provide better road handling in addition to increased hauling capability and the Mercedes-Benz® Turbo Diesel engine creates a new level of efficiency.

FEEL AT HOME AWAY FROM HOME

No matter how far you travel, the Interstate 3500 surrounds you with all the amenities of home. The galley features a 1.2 cubic foot combination convection/microwave oven for quick convenience anywhere. A stainless steel two-burner cooktop is flush mounted under a designer glass cover. The robust 3.1 cubic foot refrigerator uses an AC/DC compressor consuming 90% less power than standard models.

The Interstate 3500 also boasts a host of additional optional features well beyond others in its class, offering exceptional safety, comfort and control.

- Rear back-up camera with 5.5-inch LCD screen
- 19-inch flat panel LCD TV/DVD
- Roof-mounted 13,500 BTU high-efficiency Carrier® air conditioning unit
- Onan® 2.5 KW propane powered generator
- Manual or automatic awning

Product information, specifications, and photography in this brochure were as accurate as possible at time of printing. Photographs may contain some features that are optional on your vehicle. Since we continually strive to improve our products, actual products may differ. Prices and specifications are subject to change without notice. All capacities are approximate and dimensions are nominal. Some features or options may be different or unavailable in Canada.

Vehicle Loading – Every effort has been made to provide the greatest number of options for the recreation vehicle owner. Along with these choices comes the responsibility to manage the loads that are imposed by the choices so that they remain within the manufacturer's specified chassis weight limits. Do not overload the recreation vehicle.

Dry Weights – Based on standard features; optional equipment not included. Net carrying capacity (NCC) determined by subtracting unloaded vehicle weight (UVW) from gross vehicle weight (GVWR) and includes fluids, options, and cargo. Liquid capacities and weights are approximations only.

Warning – This information is intended as a guide only. Weights of individual vehicles may vary. Consult your owner's manual for complete loading, weighing, and towing instructions.
