

Smart Control Technology

How to Connect

Your new Airstream Classic with Smart Technology keeps you connected on the open road. (Currently only available in the United States.)

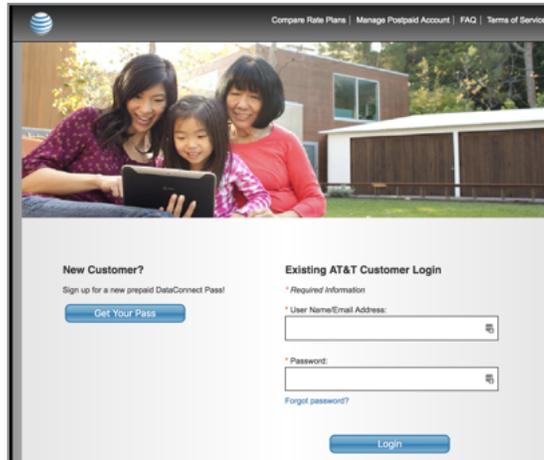

Get connected to reliable 4G LTE data in five easy steps.
The first year of 100GB's of data is on us.

- 1** To activate your data plan, you'll need two pieces of information found near the router in your Airstream. In the overhead cabinet, remove the access panel for your router. On the back of the router panel (photo below), you'll find a label with the IMEI and ICCID, which you'll need to sign up for cellular data.

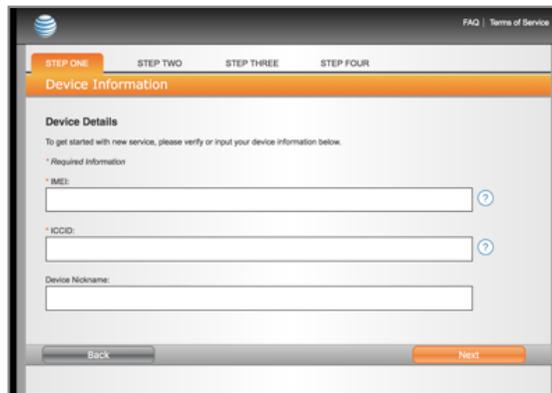

- 2** Go to att.com/airstream, choose the 12-month 100GB Adventure plan and remember to complete the enclosed Rebate Form to cover the first year of 100GB's.

- 3** Click “Get Your Pass”. Even if you are an existing AT&T customer you must sign up as a new customer to activate your Dealer plan.

The screenshot shows the AT&T website interface. At the top, there are links for 'Compare Rate Plans', 'Manage Postpaid Account', 'FAQ', and 'Terms of Service'. Below the navigation is a banner image of a family (two women and a child) looking at a tablet. The main content area is divided into two sections: 'New Customer?' and 'Existing AT&T Customer Login'. The 'New Customer?' section includes a sub-header 'Sign up for a new prepaid DataConnect Pass' and a blue button labeled 'Get Your Pass'. The 'Existing AT&T Customer Login' section includes a sub-header '* Required Information', a text input field for 'User Name/Email Address', a text input field for 'Password', a link for 'Forgot password?', and a blue button labeled 'Login'.

- 4** Enter your IMEI and ICCID from the label on the back of the router access panel and follow the steps to sign up for 4G LTE data.

The screenshot shows the AT&T website interface for the 'Device Information' step. At the top, there are links for 'FAQ' and 'Terms of Service'. Below the navigation is a progress bar with four steps: 'STEP ONE', 'STEP TWO', 'STEP THREE', and 'STEP FOUR'. The 'Device Information' section is highlighted in orange. Below the progress bar is a sub-header 'Device Details' and a note: 'To get started with new service, please verify or input your device information below.' The 'Device Details' section includes a sub-header '* Required Information', a text input field for 'IMEI', a text input field for 'ICCID', and a text input field for 'Device Nickname'. At the bottom, there are 'Back' and 'Next' buttons.

- 5** Once you’ve finished signing up for 4G LTE data, reset your device by turning the router off then back on using the keyed switch in the overhead cabinet. This will expedite the provisioning process, which shouldn’t take longer than 15 minutes.

If you need help signing up for service or managing your data plan, please call

AT&T Wireless Sales 1(888) 333-6651

and share with the customer care representative that you have an Airstream trailer.

See enclosed rebate form.
