Flying Cloud 27FB
Weight: 6,100 lbs.
Exterior Length: 28 ft.

Flying Cloud 28RB
Weight: 6,100 lbs.
Exterior Length: 28 ft.

Flying Cloud 30RB
Weight: 6,517 lbs.
Exterior Length: 30 ft. 11 in.

Flying Cloud 30FB Bunk
Weight: 6,672 lbs.
Exterior Length: 30 ft. 10 in.

Flying Cloud 30FB Office
Weight: 6,804 lbs.
Exterior Length: 30 ft. 10 in.

Flying Cloud, International, Trade Wind and Globetrotter Comparison Guide

Flying Cloud Details

- **Manual Controls:** Like Trade Wind, Flying Cloud offers manual controls for awnings and stabilizer jacks, while International and Globetrotter feature powered awnings. Globetrotter comes standard with powered stabilizer jacks.
- **Unique Floor Plans:** The 30FB Office offers dedicated workspace in the rear and the 30FB Bunk features two nearly-queen-sized bunk beds. A powered standing/sitting desk workspace is optional in the 25FB and 27FB floor plans. And like International, Flying Cloud features the popular 23FB floor plan with a rear bathroom that spans the width of the trailer – a floor plan you won't find in Globetrotter.
- **Special Features:** The rear hatch is an optional upgrade available in Flying Cloud 25FB and 27FB (as well as Trade Wind 25FB and International 25FB and 27FB) floor plans, adding easy access, gear storage, and al fresco dining options.
- **Decor Details:** Flying Cloud's neutral decor prioritizes simplicity, ability to clean up quickly, and functionality. It features Ultraleather seating fabrics and versatile laminate countertop surfaces.

International Models

International 23FB
Weight: 5,100 lbs.
Exterior Length: 23 ft. 11 in.

International 25FB
Weight: 5,600 lbs.
Exterior Length: 25 ft. 11 in.

International 27FB
Weight: 6,100 lbs.
Exterior Length: 28 ft.

International 28RB
Weight: 6,100 lbs.
Exterior Length: 28 ft.

International 30RB
Weight: 6,517 lbs.
Exterior Length: 30 ft. 11 in.

Flying Cloud, International, Trade Wind and Globetrotter Comparison Guide

International Details

- **Powered Controls:** Where Flying Cloud and Trade Wind have manual awnings, International (like Globetrotter) features powered awnings. International, Flying Cloud, and Trade Wind all feature manual stabilizer jacks that require cranking by hand to deploy.
- **Unique Floor Plans:** International shares all its floor plans with Flying Cloud, including the ever-popular 25FB and 27FB layouts. Unlike Flying Cloud, International does not feature unique bunk or office models.
- **Special Features:** Like Flying Cloud, International is available with the popular rear hatch optional upgrade in the 25FB and 27FB floor plans.
- **Decor Details:** The hallmark of International is its interior decor, inspired by coastal landscapes. Major differences in International (and Globetrotter) include solid surface countertops and built in furniture with wood molding that follows the curvature of the trailer.

Trade Wind Model

Trade Wind 25FB

Weight: 6,200 lbs.
Exterior Length: 26 ft. 2 in.

- **Manual Controls:** In order to prioritize power for living off grid, Trade Wind features manual awning and stabilizer jack controls that don't drain battery power.
- **Unique Floor Plans:** Trade Wind has only one floor plan – the versatile and popular 25FB layout, with a Twin Bed optional upgrade.
- **Special Features:** Trade Wind features an 810Ah lithium battery pack, 600 Watts of rooftop mounted flexible solar panels, and a 3000-watt inverter. Trade Wind is made for boondocking off shore power, and features a standard 3-inch lift kit, rugged tires, and a recirculating water heater that saves precious water from going down the drain.
- **Decor Details:** Two decor packages feature striking warm and cool options. Both decor packages feature a distressed concrete pattern in the luxury vinyl flooring, and the seating fabric is flecked with a heathered black for dimensionality.

Globetrotter Models

Globetrotter 25FB
Weight: 6,100 lbs.
Exterior Length: 25 ft. 11 in.

Globetrotter 27FB
Weight: 6,300 lbs.
Exterior Length: 28 ft.

Globetrotter 30RB
Weight: 6,925 lbs.
Exterior Length: 31 ft. 2 in.

Flying Cloud, International, Trade Wind and Globetrotter Comparison Guide

Globetrotter Details

- **Powered Controls:** Put down your awning or lower your stabilizer jacks with the push of a button.
- **Unique Floor Plans:** Globetrotter's 25FB and 27FB models feature similar floor plans to what you find in same-sized trailers down the line, but the 30-foot Globetrotter features a unique dinette on the streetside with a narrow table that owners love.
- **Special Features:** The gorgeous kitchen features a wide, deep sink and two inset storage bins in the solid-surface countertop. Overhead roof lockers feature elegant curved designs that set Globetrotter apart, with a unique design constructed from a single piece of molded lite-ply and a radius that mimics the curvature of the trailer. Where Flying Cloud and International feature Ultraleather seating, Globetrotter takes comfort to the next level with award-winning HITCH seating fabrics with a subtle woven pattern.
- **Decor Details:** With design influenced by the very best of modern European style, Globetrotter's interior is a warmly inviting design enthusiast's dream come true. Elegant fixtures, gorgeous wood laminates, solid surface countertops, and a beautiful soft goods package elevate Globetrotter above its comparatives.

	Power Controls	Rear Hatch Option	Solid Surface Countertops	Solar & Lithium Capacity
